# Dodona Oak of Zeus & Celtic Nature Worship

The oak tree was sacred to Zeus, especially the tree at the sanctuary of Zeus in Dodona which also served as an oracle. The rustling of the oak leaves was regarded as the voice of Zeus and the sounds interpreted by priestesses. The pre-Christian world was the world of Celts, who worshiped nature. To the Celtic outlook, the land was the main goddess, the rivers were her helpers and they enriched the earth. Celts used to live in forests, where they were close to the nature and could learn the language of trees and wisdom of animals. With the appearance of Christianity ancient Celts didn't disturb their close ties with nature; they connected their love to nature with the main principles of Christianity. Celtic monks lived in deep forests and wrote their religious works for the gifts of nature. The most important thing was to understand the divine origin of all things and god's existence in nature. Celts saw life as a constantly changing circulation of life and death. Everything moved in a spiral and nature's observation gave a possibility to find mechanism of development of the world - *The Engineer of Knowledge Blog*.

## Nazi Oaks

Unbeknownst to many, the highway to modern environmentalism passed through Nazi Germany. By 1935, the Third Reich was the greenest regime on the planet. Many scholars have rightly focused on Nazi racism over the years, but have often failed to notice that German Social Darwinism was rooted in ecology. What the Nazis derogatively labeled "the Eternal Jew," the Jew who tried to overcome nature through international commercialism and cosmopolitanism, was specifically targeted. It is no coincidence that sweeping Nazi environmental legislation preceded the racially charged anti-Semitic Nuremberg Laws. Furthermore, the quest for "Living Space" in the East, was far more than just another form of colonial expansionism. It was also a sinister eco-imperial plan designed to Germanize the landscape by removing populations of people who were unsuited to their environment, and by turning it into a beautiful natural park for the future health of the German race.

In 1989, Mark Musser graduated from the Evergreen State College in Olympia, Washington, one of the premier environmental institutions in the country. In 1994, he received a Master of Divinity from Western Seminary in Portland, Oregon. Mark was a missionary to Belarus and Ukraine for seven years. He is now a pastor.
